Nothing There

GDD v0 - Yiğit Dilekçi - 240517024 – GITHUB - 2026-10-13

1. Pitch

You are an insomniac facing a wall to sleep, turning your head toward unsettling noises to survive minor jumpscares until the final one wakes you up.

2. Core loop

- **The verb:** You move the mouse to turn your character away from the wall to look directly at the source of a sound.
- **What makes it harder:** Ambient noises that force you to look around without knowing it will result in a jumpscare or not.
- **What makes it satisfying:** After a night full of jumpscares and thrilling the bliss of waking up the next morning even with the final scare.
- **How it ends:** You win by passing enough time for the character to get one big scare at the end, resulting in the character waking up next morning.
- **Modes or difficulty:** Non-Existent.

3. Flavor

3D first-person built in Unity 6 LTS Universal 3D.

4. List of Three Games

1. **Five Nights at Freddy's 4** (Scott Cawthon, 2015) - take: sound-based bed defense / cut: multiple room doors.
2. **Slender: The Eight Pages** (Parsec Productions, 2012) - take: line-of-sight anomaly interaction / cut: walking through a large forest.
3. **Photomaly** (Indie, 2024) - take: retro low-poly uncanny valley style / cut: photography mechanics.
